

TRAIL CREW

Rangeley Lakes Trails Center, 524 Saddleback Mountain Road, Dallas Pt

The Rangeley Lakes Trails Center, located on the Saddleback Mountain Road, is requesting applications for **three** members of a trail crew, working 8-12 weeks from June to September. The trail crew will be continuing construction of new mountain bike trails within the existing nordic trail network.

Willingness to learn the art and skill of trail construction is required. Past experience and knowledge in sustainable trail, and off-road construction is not required but preferred. Additional skills such as certified chainsaw, certified first aid, experience working with youth, avid MTB rider, will all be considered during the application process. References will be required, all interested parties encouraged to apply regardless of previous experience.

The Rangeley Lakes Trails Center is an equal opportunity employer. Starting hourly wages will be based on knowledge, experience, ability to commit to the full work season: 32 hours per week, work week will be Mon-Thur 7AM-3:30PM, unpaid 30 minute lunch. Weekends off. (We are flexible and willing to work with your availability.)

General Overview of Trail Crew Member tasks:

- Ability to follow direction, learn from directions, and become self-guiding
- Ability to work in a small team atmosphere, with importance based on quality work, respectful interactions and attention to detail
- Ability to work outside in the woods in all weather conditions
- Ability to prioritize safety, and understand dangerous situations within an environment working with a UTV, mini bucket loader, chainsaws, and other trail crew members
- Ability to operate or learn to operate a UTV, dump cart and mini Bobcat and transport tools, supplies and fuels to and from remote job site locations
- Ability to push, pull, and lift approximately 50 lbs at one time
- Ability to spend some amount of time bending over, and using trail building hand tools (shovels, rakes, tampers)
- Ability to perform routine daily inspections and maintenance of machinery
- Flexibility pertaining to the daily tasks
